ABOUT ME

Angular-focused Full Stack Developer with experience building **responsive** and **scalable web applications** using **Angular (v8-v22)**.

Passionate about writing **clean, maintainable** code and **building reusable, high-quality applications**.

Alongside my frontend expertise, I have solid experience in **backend development** with **Node.js** and **Express.js**,

I am always open to learning **modern technologies** and expanding my **skill set**, while **collaborating** with **teammates** and **supporting** them in finding **effective solutions** to **development** challenges.

EDUCATION AND TRAINING

[2023 – 2026]

Bachelor in Informatics

Faculty of Natural Sciences, University of Tirana

City: Tirana | Country: Albania

WORK EXPERIENCE

Freelancing

City: Tirana | Country: Albania

[12/2024 – Current]

Angular Developer

- Proficient in **HTML, CSS/SCSS, Tailwind** and **JavaScript** for creating **interactive** and **dynamic** web pages for a better user experience.
- Developed **pixel-perfect, responsive** designs for optimal user experience on all devices.
- Familiar with **best practices** for clean, modular code to improve scalability and readability.
- Built modern **Single Page Applications (SPAs)** using latest **Angular** versions, leveraging **components, services, routing, and forms**,
- Designed and developed reusable **Angular** components to maintain **consistency** and reduce code duplication across the application.
- **Developed interfaces using Angular Material / PrimeNG and custom SCSS** to create visually appealing and responsive user interfaces.
- Applied **RxJS** for **reactive** programming, managing **asynchronous** data streams and enhancing performance.
- Implemented **state management** using **NgRx Store** to handle complex application state in a predictable and scalable way.
- Implemented **Angular Signal Store** for **reactive state management**, enabling efficient state updates.
- Followed **Angular best practices** for **performance optimization**, developing **zone less applications** for **faster rendering** and **improved efficiency**.
- **Designed and implemented new features** for better maintainability.
- Adapted and implemented **client requests** for **customized, functional** websites.
- Integrated **RESTful APIs** using **Node.js** and **Java**, following the **MVC** pattern to keep backend logic **organized** and **scalable**.

- Experienced in working with **SQL (MySQL and PostgreSQL)** and **NoSQL (MongoDB)** databases
- Familiar in **version control** systems like **Git** to manage and track code changes effectively.

Satisor Startup

City: Tirana | **Country:** Albania

[01/2026 – Current] **Angular Developer**

- Designed and implemented **reusable** Angular **components** to improve code **maintainability, consistency, and development efficiency**.
- Implemented **secure cookie-based authentication** with **role-based access control**, ensuring **protected routes** and persistent user sessions.
- Integrated third-party services such as **Paddle Payments**.
- Applied **RxJS** and **Angular(v21) Signals** for **reactive programming**.
- Implemented **state management** using **ngRx Global Store, Component Store , Signal store** for better **scalability and maintainability**.
- **Refactoring** and **maintaining** existing components.
- Developed **unit tests** using **Jasmine , Karma and Vitest** in the latest **Angular** versions to ensure software reliability and function across multiple browsers.
- Optimized application **performance** using **lazy loading** and modern **Angular** best practices.
- Collaborated using **Git** and modern development workflows.

PROJECTS

Admin Dashboard

Built a modern **Admin Dashboard** with **Angular 19**, featuring a highly **dynamic** and **reusable** table component for managing users.

The table supports full **CRUD operations** with sorting, filtering and pagination.

Every component is **reusable** and **configurable** allowing the dashboard to adapt easily to different datasets and requirements.

Additional features include form validation and comprehensive unit testing with **Jasmine** and **Karma** to ensure full functionality, prevent errors and catch bugs early.

A lightweight **backend JSON Server** was also implemented to provide dynamic data for the dashboard.

Flight Management System

Built a **Flight Management Application** with **Angular 19, Node.js**, and **JSON Server**, implementing role-based authentication and authorization. Users can search and filter flights, while administrators can manage both flights and registered users through full CRUD functionality.

Pharmaceutical Store

Developed a responsive **Pharmaceutical Store** website using **HTML5, CSS3**, and **JavaScript** for a client's pharmacy business. Designed a clean and intuitive interface to showcase medicines and pharmaceutical products, providing customers with an easy-to-navigate browsing experience across desktop and mobile devices.

Users Management API

Developed a lightweight backend using **Node.js** and **JSON Server** to simulate RESTful APIs for the **Admin Dashboard** application. The backend provides dynamic user data and supports frontend integration for user management features, enabling realistic CRUD operations during development.

Flight Tracker

Developed a **Flight Tracker** application with **HTML5**, **CSS3**, and **JavaScript**, implementing full CRUD functionality for creating, viewing, updating, and deleting flight records through a responsive and intuitive user interface.
